

PhD theses passed in 2009			
Surname	First name	Supervisor	Title of thesis
Bidwell	Bradley	Robin Anderson	The role of the immune system and immunomodulatory cytokines in breast cancer metastasis
Binger	Katrina	Geoff Howlett	The reversibility of amyloid fibril formation
Bolden	Jessica	Ricky Johnstone	Investigating the molecular basis of histone deacetylase inhibitor-mediated tumour-selective cell death
Dagley	Michael	Trevor Lithgow	Protein translocation in the remnant mitochondrion of <i>Giardia intestinalis</i>
Greening	David	Richard Simpson	Isolation and characterisation of endogenous peptides
James	Patrick	Matt Perugini	Lipid-lipid and apolipoprotein-lipid interactions in the gas and solution phases
Lieu	Zi Zhao	Paul Gleeson	Regulation of membrane transport pathways by GRIP domain golgins
Pal	Bhupinder	Mary-Jane Gething	Degradation of the Had1p transcription factor regulates the unfolded protein response in <i>Saccharomyces cerevisiae</i>
Parker	Lorien	Michael Parker	Crystallographic studies of the recognition of anti-cancer compounds by glutathione transferase pi
Poon	Carole	Helena Richardson	Investigation of the role of Src kinases in cooperative tumourigenesis with RasACT in <i>Drosophila</i>
Saunders	Eleanor	Malcolm McConville	Investigations into the metabolism of the <i>Leishmania</i> parasite using a metabolomic approach
